

Timirah James
Core Development Evangelist
Verizon Digital Media Services

HER JA STORY

Timirah James was a JA of Georgia kid in Atlanta. Timirah was looking for a creative outlet in high school and actually sought out JA on her own.

She joined the JA Company Program at the Chick-Fil-A Corporate HQ in Atlanta and her student team went on to invent LED Cups!

Since then, Timirah has moved out to Playa Vista, CA where she works as Core Development Evangelist at Verizon Digital Media Services.

She says JA gave her "the advantage of understanding how a business operates at a young age. From business terminology, building out a solid business plan, to the importance of stakeholders. JA has definitely contributed to my sense of business, even in the tech industry. I would trade my JA experience for anything!"
